HAND CARE PROGRAMME

Americol hand care products: protect, clean and care

In today's world hands are exposed daily to a range of industrial pollutants. This takes its toll on the skin. Optimal protection, cleaning and care of your skin is critical for keeping your hands in good condition. Americol makes the right products for every use. With easy-to-read colour coding on the packaging, you can see in one glance which products in the Americol hand care programme protect, clean, disinfect or care for your hands.

PROTECT

Materials that are harsh on the skin can lead to long-term skin damage. Americol Hand Protect Lotion protects your hands against damaging materials that come in contact with skin.

Even if you wear protective gloves, your hands can sustain damage. Skin transpires, swells and weakens inside gloves, which can leave your hands susceptible to the harsh effects of operating mechanical equipment.

Hand Protect Lotion protects your skin and makes cleaning your skin easier. It's simple to use: apply to clean, dry skin prior to doing work and after washing hands.

CLEAN

The right hand cleaner is determined by which type of contaminant is present. Consult the product recommendation guide to select the right product for your needs.

Americol hand cleaners are carefully composed and focused on effective cleaning and optimal hand care. Rub a small amount of hand cleaner into dry hands until dirt loosens. A small amount of water can be added if desired. Rinse with water or a clean towel and dry hands well.

CARE

Regular use of the right care products stimulates the natural recovery of the skin, leaving it smooth and supple. The use of Hand Care Lotion facilitates optimal skin condition. It's simple to use: apply to clean, dry skin after working with hands.

CERTIFICATION

In addition to the ISO 9001:2008 certification, the management system of Americol is officially ISO 22716:2007 (Cosmetics-GMP) certified for manufacturing, filling, packing and storage of personal care products and hand cleaning & hand care products.

Our cosmetical products are dermatologically tested and approved.
